SUMMARY

Product Designer with 3+ years designing multi-role SaaS, fintech and mobile products, from discovery to post-launch. Sole designer on a live hospitality platform used by 5+ US resorts, working daily with developers and QA. Turn complex logic into simple flows: cut a 9-step flow to 4 and a 7-screen workflow to 2. Validate with usability testing and WCAG 2.1 AA checks before release, and keep a shared Figma design system consistent across products.

CORE COMPETENCIES

Product design	End-to-end UX/UI, user flows, wireframes, prototyping, high-fidelity UI, information architecture
Research and QA	User research, usability testing, journey mapping, data-informed iteration, WCAG 2.1 AA
Design systems	Component libraries, tokens, auto layout, documentation, design debt reduction
Collaboration	Agile/Scrum, dev handoff, product and engineering partnership, stakeholder presentations
Tools	Figma, Figma Dev Mode, FigJam, Framer, Stark, Claude, Figma Make, Google Stitch, UX Pilot, Photoshop, Canva

PROFESSIONAL EXPERIENCE

Product Designer

Jul 2025 - Present

Magnumsoft Engineering, Noida | Custom web and mobile applications

- Sole designer on [Virtual Waiter](#), a live multi-role hospitality SaaS (admin, manager, chef, runner) used by 5+ US resorts. Took it from discovery and research to post-launch with developers and QA.
- Cut a 9-step order-and-payment flow to **4 steps** after usability testing, and added item-level tracking with a timer so the kitchen sees which item is late.
- Redesigned manager and admin onboarding from **7** forms and screens into **2**, by setting up each space on its own and showing only the fields that apply to it.
- Designed a predictive inventory dashboard, guided by data and user feedback, that cut stockouts by **62%** in a pilot.
- Designed plan-configuration flows for **Ericore**, an insurance client, turning premium logic and eligibility into combinable AND/OR rules (BFSI).
- Refactored the Figma design system used across all my Magnumsoft products: removed unused and duplicate components and redesigned about **11** as reusable ones.
- Designed owner, tenant and handyman workflows for [RentzGo](#), a rental platform, cutting booking steps by **30%**.

UI/UX Designer and Graphic Designer

Jan 2025 - Jun 2025

I Dont Blabber, Bengaluru | Marketing and design agency

- Designed a complete app end to end, from flows and wireframes to production-ready UI and developer handoff in Agile sprints, for businesses such as real estate firms and agencies.
- Presented and defended design decisions directly to clients and stakeholders.
- Built a documented shared Figma component library that ended rebuilding components from scratch.
- Designed client web pages in Framer and Wix, using micro-animations, to win stakeholder buy-in before development.
- Created logos, brand creatives, social media posts and BNI magazine design for many clients.

UI/UX Designer

Jan 2024 - Nov 2024

Parshi Emerging Technologies, Jaipur | EdTech and enterprise solutions

- Designed three consumer products end to end at the same time, each with its own users, logic and edge cases: a personalized skincare app, a productivity app and a smart-home/IoT control app.

UI/UX Design Intern

Feb 2023 - Dec 2023

CAD Desk, Jaipur | CAD software training and product company

- Designed the complete ordering flow for a bakery client, covering menu, order, pickup and delivery. The client uses it live, and customers order through it every day.

EDUCATION

B.Tech, Electrical Engineering (First Class)

2016 - 2020

Swami Keshvanand Institute of Technology (SKIT), Jaipur
